EDUCATION

Shah & Anchor Kutchhi Engineering College

Bachelor of Technology in Information Technology

CGPI: 9.67

Dec 2021 – May 2025

Chembur, Maharashtra

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, HTML/CSS

Frameworks/Tools: Node.js, React, Next.js, Django, Flask, Express.js, Swagger

Databases: MySQL, MongoDB

AI/ML: YOLOv5, TensorFlow, LSTM, OpenCV

Other Tools: Git, Linux, Streamlit, Postman, Arduino, VS Code

EXPERIENCE

Backend Developer Intern

Jun 2024 – Sep 2024

Bot2do Technologies

Mumbai, India

- Collaborated with the development team to lead backend development for the ScaleSecure platform using Node.js.
- Managed MongoDB databases, implementing query optimizations that reduced data retrieval time and enhanced system efficiency.
- Designed and optimized RESTful APIs, improving performance and scalability of backend services. Developed new API endpoints and streamlined the existing codebase to support upcoming product features.

Full Stack Intern

Jul 2023 – Aug 2023

The Hobby Tribe

Mumbai, India

- Contributed to improving community participation and creating a social experience based on hobbies.
- Developed interactive features such as a stress meter and a streak plan system to boost user retention.
- Designed and deployed an Explore page that enables users to post, share, and interact (like, comment, share) about hobby-related content.

PROJECTS

Real-time Violence Detection (*Flask, YOLOv5, OpenCV*)

February 2025

- Built an AI-powered surveillance system detecting violent activities in live video streams with real-time alerts and geolocation mapping.
- Designed an interactive monitoring dashboard to visualize events and enable faster incident response for security teams.

Women's Safety Analytics (*OpenCV, TensorFlow, Keras, Conv2D, Haar Cascade*)

October 2024

- Developed a real-time system for gender classification and threat detection using a custom-trained CNN model for violence detection and Haar Cascade for gender classification, achieving 98.2% accuracy.
- Utilized OpenCV for image processing, and integrated TensorFlow and Keras for building and training the deep learning model to detect potential dangers and generate real-time alerts.

Industry Standard Admin Dashboard (*React, ExpressJS, MongoDB, Figma, Machine Learning*)

April 2024

- Developed an Admin Dashboard using React that enables companies to track sales, products, customer data, and reviews in real-time, presenting information in an organized and readable format.
- Enhanced the dashboard by integrating machine learning algorithms to predict sales and other factors for upcoming seasons, empowering companies to make informed decisions based on data-driven insights.

Stock Market Prediction (*LSTM, Streamlit*)

January 2024

- Created an LSTM-based predictive model utilizing historical trends and moving averages for accurate stock price forecasting.
- Built a Streamlit dashboard enabling real-time visualization of market predictions and interactive analysis.

ACHIEVEMENTS & LEADERSHIP

- Silver Medalist in 1st Year B.Tech IT.
- 1st place in Final Year Project Presentation for Real-time Violence Detection.
- Admin Head, Institution Innovation Council (IIC 7.0) and Social Media Co-Head, CSI & IIC 6.0.
- Certified in Data Analytics Essentials, Python, Ethical Hacking, Database Design, Agile Software Development and Blockchain Fundamentals.
